

light grey

Grey, which like black is a non-colour, is the true neutral, and thus risks being bland and uninteresting. However, when the right tone is selected, anywhere from charcoal or slate through to soft dove, grey can be an ideal backdrop, or accent in practically any colour scheme.

& grey

In theory grey is the only true neutral, but in practice greys come from all around the spectrum. greys work well with yellows and reds, are subtly unobtrusive with creams and blues and sumptuously sophisticated in combination with light yellows and beige.

Please take the time to check an actual powder coated sample of the colour of your choice.
