

# white / cream

White in its purest form can be stylish and cool or stark and demanding. This is responsible for its enduring popularity as a trim colour and as a main decorating theme. Works of art, collections and fabrics are all presented to advantage in a white environment.

# & beige / yellow

Beige is classical, soothing and commonly used in conjunction with earth tones to create an atmosphere of peace and serenity.

From sandy beige to rich ochres, yellow radiates warmth and friendliness.

**Please take the time to check an actual powder coated sample of the colour of your choice.**
